### **Education**

#### High School Diploma

August 2012 - 2016

International
 Baccalaureate Program
 with 4.2 GPA and 34
 college credit hours out
 of high school

# Nuclear Field 'A' School, Powerschool, and Prototype

August 2018 - 2020

 Rigorous theoretical and practical training on Naval Nuclear
 Propulsion systems, radiation, physics, thermodynamics, chemistry, and anything else necessary for safe nuclear reactor operations and maintenance

# **Certifications**

- 'Secret' Clearance
- Quality Assurance Craftsman
- Maintenance Techician

# **Anthony Desisto**

# U.S. Navy Nuclear Mechanic

August 2018 - 2024

- Email: Adesisto16@yahoo.com
- Cell Phone Number: 720-365-8807
- Address: 6805 S Langdale St, Aurora CO 80016

# **Experience**

Machinists Mate, Nuclear

August 2018 - 2024

- Expertly operated and maintained nuclear propulsion systems on a naval vessel, ensuring optimal performance and safety
- Trained and supervised junior personnel in proper procedures for operating and maintaining nuclear machinery and equipment.
- Responsible for regulating nuclear reactor systems, monitoring radiation levels, and strict adherence to safety and maintenance protocols

# Maintenance Team Supervisor

July 2022 - 2024

- Collaborated with other departments to streamline communication and improve overall productivity and teamwork necessary for the mission
- Supervised a team of 40 maintenance technicians, providing guidance, training, and support to ensure mission goals are achieved safely and effectively

#### **Skills**

- Strict Procedural Compliance
- Preventive and Corrective Maintenance on Mechanical and Electrical Systems
- Self-driven Project
   Management
- Team Based Objectives and Communication
- Adaptability in Critical Situations
- Safe Work Involving
   Hazardous Substances
   and Potential Radiation
   Exposure
- Firefighting and Damage Control
- Self-driven Education
- On the Job Training for New Trainees

#### Calibration Technician

October 2022 - 2024

 Appointed the Calibrations Program Manager for my division, responsible for proper tracking, calibration, and installation of tools and gauges used for monitoring equipment performance and providing repairs as necessary

#### Damage Control Petty officer

June 2023 – August 2024

 Performed countless repairs on ships damage control equipment every day (Fire extinguishers, Fire Hoses, Watertight Doors and Hatches, etc.) ensuring rapid and effective response in the event of a ship wide casualty such as fires or flooding
